Re: 2016 Street Improvements Bid

Advertisements were published per the city purchasing policy for 2016 Street Improvements Bids.

Two projects were presented to council at an earlier council work session. The projects are to remove existing asphalt, prep sub-grade, and replace broken curb/gutter; concrete drainage pans and place new asphalt at 3" thick compacted. The two projects are San Juan from Wisconsin to Teller and North 14th from Hwy. 50 to Spencer. The budgeted amount for 2016 street improvements is \$655,000.

We received one bid from locally based United Companies for \$679,488.75 which is \$24,488.75 more than budget. City staff will work with Greg Frazier of United Companies to identify any cost savings and are reductions in the scope of work to bring the project in at the budgeted amount of \$655,000.

Staff recommends council approval to award the 2016 street improvements bid to United Companies at the next regularly scheduled council meeting on May 24, 2016 for an amount not to exceed \$655,000.
