Hi Cassie,

My Name is Dave Holt. I am writing to voice my support for lower speed limits in town. I support 20mph because people drive 5 mph over posted limit. We have a 4 yr old daughter and are very concerned about the increased traffic and speeds of cars and trucks going through town. I think a reduced speed limit would make our town much safer. It would also encourage through traffic to stay on the highways and not travel through Side streets at high speeds. I believe an increased presence of education/enforcement would also help our speed issue. As a side note: we live on N Wisconsin and have never seen a car stopped for speeding.

Noise is also a concern. Modified automotive exhaust specifically "straight piped diesel trucks" are a major source of noise pollution in our town. There are laws that state that a automobile cannot be modified to be louder than it was manufactured, yet the noise from these modified exhaust systems is a constant it seems. Not sure how this could be enforced, but I believe a change would make quality of life in town much better.

Thanks for listening, I hope this helps.

Dave Holt
